

Product Name and Version : StrateqEHR, Version 5

The patient EHI export contains data from the patient's chart. Multiple file formats are used to store this information.

ZIP is an archive file format.

PDF or Portable Document Format is a file format that is used to present text or image based documents.

C-CDA or Consolidated Clinical Document Architecture is a file format used for health information exchange.

The export file itself is a zip file. It contains zip files of C-CDAs and other files attached to the patient's chart (e.g. PDF and images)

Information for each patient encounter is available C-CDA format in zip archive.
